Subject: PFAS Agenda and Summit Goals
Attachments: DRAFT_Agenda PFAS National Leadership Summit_5.10.18-v1.pdf

All:

Attached is an updated agenda and the summit goals. Erin, thanks for tracking this down for everyone.

Goals of the summit:

- Share information on ongoing efforts to characterize risks from PFAS and develop monitoring and treatment/cleanup techniques.
- Identify specific near-term actions, beyond those already underway, that are needed to address challenges currently facing states and local communities.
- Develop risk communication strategies that will help communities to address public concerns with PFAS.
- Post-Summit
 - EPA will travel to states with communities impacted by PFAS to further engage on ways the EPA can best support the work that's being done at the state, local, and tribal levels. Using information from the Summit and community engagement, EPA plans to develop a PFAS Management Plan for release later in 2018.
 - EPA will provide the public with the opportunity to send written input to the EPA, and details for that process will be available on the website.
